

Hamra

(Speedboat)

Distance: 10 minutes by speedboat south from our jetty

Description: The current that run slowly from north to south, creates favorable conditions for easy drift dives. The fringing reef starts at 5 meter depth and goes gradually down until 30 meter. From the sand bottom are rising up many coral blocks overgrown with hard and soft corals.

Entrance with backwards roll from the speedboat.

Flora and Fauna: Eagle ray, napoleon

Difficulty: Easy, mild current. Suitable for all diver levels, no snorkeling.

Depth: 10 – 35 meter
