

# Koraffi

(Speedboat)

**Distance:** 15 minutes by speedboat south from our jetty

**Description:** Koraffi is the name of the family, which built Port Ghalib. In this place, they built their private villa. The place is well-protected and nice coral blocks have grown here. Usually we start the dive in the north and dive with the mild current in south direction. The reef at this wall drops down to 10 meter and then there is a stretch of coral blocks that extend until 25 meter.

Entrance with backwards roll from the speedboat.

**Flora and Fauna:** Triggerfish, parrotfish, wrasses, turtle, napoleon, moray eel, soldier fish and sometimes eagle rays in the blue.

**Difficulty:** Easy, no current. Suitable for all diver levels, not for snorkeler.

**Depth:** 5 – 30 meter
