

# Marsa Murain

(Bus trip)

**Distance:** 25 minutes by minibus in south direction.

**Description:** The point of entry is from the beach through a narrow bay with a rope. Here you can dive both sides, north and south. The south side is sloping gradually down passing a sea grass meadow. Along the reef are many hiding places for small inhabitant in the cleft reef. The north side is covered with hard corals, particularly fire corals. The reef wall levels out at 25 meter.

**Flora and Fauna:** Fire corals, soft corals, triggerfish, scorpion fish, angelfish, wrasses, grouper and nudibranch can be found here.

**Difficulty:** Easy, less current. Suitable for all level of divers and snorkelers

**Depth:** 1 – 35 meter
