

Rakarna

(Speed Boat)

Distance: 10 minutes by speed boat north from our jetty.

Description: An old fishing boat on the reef top marks the place. Rakarna is a fringing reef and we dive usually from north to south with the mild current. Many coral boulders are scattered around on the sand bottom. Most marine life can be found between 10 and 20 meter depth.

Entrance from the speedboat with backwards roll.

Flora and Fauna: Shoals of fusiliers, mackerel, trigger fish, turtles, eagle ray, scorpion fish

Difficulty: Easy, mild current. Suitable for all diver levels, not for snorkelers.

Depth: 12 – 30 meter
