

# Marsa Umm Gerifat

**Distance:** Direct from our jetty or short ride by zodiac.

**Description:** Large bay with 4 - 5 different dive possibilities. The north side is a fringing reef with a sand plateau at 15 meters and extending to more than 40 meters. At the entrance of the bay, you can find many coral towers and blocks. On the south side, there are several small canyons to explore. Outside of the bay a fringing reef exists similar to the north side. From the north and south sides, one way dives back to the jetty are possible with our zodiac. With bad weather conditions, diving inside the bay is possible where you can find a small sea grass meadow.

**Flora and Fauna:** Hard and soft coral, fusiliers, mackerel, tunas, scorpion fish, butterfly fish, basslet, nudibranches, eagle rays, turtle, surgeon fish and napoleon fish.

**Difficulty:** Easy, light current. Suitable for all diver levels and snorkelers.

**Depth:** 2 – 40 Meter
